

```
absl::str_format_internal  
::FormatConversionSpecImpl  
::has_left_flag
```

```
graph LR; A["absl::str_format_internal  
::FormatConversionSpecImpl  
::has_left_flag"] --> B["absl::str_format_internal  
::FlagsContains"]
```

A diagram showing a call from the `FormatConversionSpecImpl` class to the `FlagsContains` method. The left box, representing the caller, is shaded gray and contains the text `absl::str_format_internal::FormatConversionSpecImpl::has_left_flag`. A blue arrow points from the right side of this box to the right box. The right box, representing the callee, is white with a black border and contains the text `absl::str_format_internal::FlagsContains`.

```
absl::str_format_internal  
::FlagsContains
```
