

absl::ABSL\_NAMESPACE  
\_BEGIN::LiteralPolicy::Find

absl::ByChar::Find

absl::ByString::Find

absl::string\_view::find

```
graph LR; A["absl::ABSL_NAMESPACE  
_BEGIN::LiteralPolicy::Find"] --> D["absl::string_view::find"]; B["absl::ByChar::Find"] --> D; C["absl::ByString::Find"] --> D;
```

The diagram illustrates a function lookup or delegation mechanism. Three source functions on the left are connected by blue arrows to a single target function on the right. The target function, 'absl::string\_view::find', is highlighted with a gray background, while the source functions have white backgrounds. The arrows originate from the right side of each source box and point towards the left side of the target box.
