

`absl::operator%`

`absl::operator/`

`absl::int128_internal
::BitCastToSigned`

```
graph LR; A[absl::operator%] --> C[absl::int128_internal::BitCastToSigned]; B[absl::operator/] --> C;
```

The diagram illustrates the implementation of two operators, `absl::operator%` and `absl::operator/`, which both delegate to the `absl::int128_internal::BitCastToSigned` function. The operator boxes are white with black borders, while the function box is gray with a black border. Blue arrows indicate the mapping from each operator to the function.
