

absl::strings_internal
::SingleArgStrCat

absl::strings_internal
::SingleArgStrCat

absl::strings_internal
::FloatToString

```
graph LR; A["absl::strings_internal::SingleArgStrCat"] --> C["absl::strings_internal::FloatToString"]; B["absl::strings_internal::SingleArgStrCat"] --> C;
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders, each containing the text 'absl::strings_internal' followed by '::SingleArgStrCat' on two lines. On the right, there is a single gray box with a black border containing the text 'absl::strings_internal' followed by '::FloatToString' on two lines. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a mapping or relationship between the two 'SingleArgStrCat' instances and the 'FloatToString' function.
