

`std::exception`

```
graph BT; A[absl::bad_optional_access] --> B[std::exception];
```

The diagram illustrates an inheritance relationship between two C++ exception classes. At the bottom, a gray rectangular box contains the text `absl::bad_optional_access`. Two blue arrows originate from the top of this box and point upwards towards a white rectangular box at the top, which contains the text `std::exception`. This visualizes that `absl::bad_optional_access` inherits from `std::exception`.

`absl::bad_optional  
_access`
