

absl::debugging_internal
::ParseSeqId

```
graph LR; A[absl::debugging_internal::ParseSeqId] --> B[absl::debugging_internal::IsDigit]; A --> C[absl::debugging_internal::RemainingInput];
```

The diagram illustrates a function call. A gray box on the left, labeled 'absl::debugging_internal::ParseSeqId', has two blue arrows pointing to two white boxes on the right. The top white box is labeled 'absl::debugging_internal::IsDigit' and the bottom white box is labeled 'absl::debugging_internal::RemainingInput'.
