

```
std::is_base_of< A  
< T, N >, std::array  
< T, N > >
```

The diagram consists of two rectangular boxes. The top box is white with a black border and contains the C++ code `std::is_base_of< A < T, N >, std::array < T, N > >`. The bottom box is gray with a black border and contains the C++ code `absl::strings_internal ::IsBaseOfArrayImpl< A < T, N > >`. Two blue arrows point upwards from the bottom box to the top box, indicating that the implementation in the bottom box inherits from or is a specialization of the function in the top box.

```
absl::strings_internal  
::IsBaseOfArrayImpl< A  
< T, N > >
```
