

Eigen::BVMinimize

Eigen::BVMinimize

Eigen::internal::minimize  
\_helper

```
graph LR; A[Eigen::BVMinimize] --> C[Eigen::internal::minimize_helper]; B[Eigen::BVMinimize] --> C;
```

The diagram illustrates a relationship between two public-facing Eigen classes and an internal helper function. On the left, there are two identical white rectangular boxes, each containing the text 'Eigen::BVMinimize'. On the right, there is a single gray rectangular box containing the text 'Eigen::internal::minimize\_helper' on two lines. Two blue arrows originate from the right side of each 'Eigen::BVMinimize' box and point towards the left side of the 'Eigen::internal::minimize\_helper' box, indicating that both public classes utilize this internal helper.
