

eigen/unsupported/Eigen
/src/MatrixFunctions/StemFunction.h

```
graph BT; A[eigen/unsupported/Eigen/src/MatrixFunctions/StemFunction.h] --> B[eigen/unsupported/Eigen/src/MatrixFunctions/MatrixExponential.h]; A --> C[eigen/unsupported/Eigen/src/MatrixFunctions/MatrixFunction.h];
```

The diagram illustrates a header file dependency. At the top, a grey box represents the header file `eigen/unsupported/Eigen/src/MatrixFunctions/StemFunction.h`. Below it, two white boxes represent source files: `eigen/unsupported/Eigen/src/MatrixFunctions/MatrixExponential.h` on the left and `eigen/unsupported/Eigen/src/MatrixFunctions/MatrixFunction.h` on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include this header.
