

Eigen::TensorBase<  
Derived, ReadOnlyAccessors  
>::cast

```
graph LR; A["Eigen::TensorBase<Derived, ReadOnlyAccessors>::cast"] --> B["Eigen::choose"]; A --> C["Eigen::TensorBase::derived"]
```

The diagram illustrates the internal logic of the `Eigen::TensorBase::cast` method. A central gray box represents the method signature. Two blue arrows originate from its right side, pointing to two separate white boxes. The top arrow points to a box containing `Eigen::choose`, and the bottom arrow points to a box containing `Eigen::TensorBase::derived`.

Eigen::choose

Eigen::TensorBase::
