

Eigen::ThreadLocal
::ThreadLocal

```
graph LR; A[Eigen::ThreadLocal::ThreadLocal] --> B[Eigen::MaxSizeVector::emplace_back]; A --> C[Eigen::MaxSizeVector::resize];
```

The diagram illustrates a call from the `Eigen::ThreadLocal::ThreadLocal` function to two methods of the `Eigen::MaxSizeVector` class: `emplace_back` and `resize`. The source function is in a grey box on the left, and the two target methods are in white boxes on the right. Blue arrows indicate the direction of the calls.

Eigen::MaxSizeVector
::emplace_back
