

```
absl::compare_internal  
::weak_ordering_base<  
weak_ordering >
```

The diagram illustrates an inheritance relationship. At the bottom, a grey box contains the text 'absl::weak_ordering'. Two blue arrows point upwards from this box to a white box above it. The white box contains the text 'absl::compare_internal::weak_ordering_base<weak_ordering >'. This indicates that 'absl::weak_ordering' is a base class or component used by 'absl::compare_internal::weak_ordering_base'.

```
absl::weak_ordering
```
