

Compare

```
graph BT; A["absl::container_internal::checked_compare_base<Compare, is_class>"] --> B[Compare];
```

The diagram illustrates an inheritance relationship. At the bottom, a gray box contains the text `absl::container_internal::checked_compare_base < Compare, is_class >`. Two blue arrows point upwards from this box to a white box at the top labeled `Compare`, indicating that the base class inherits from the `Compare` class.

`absl::container_internal  
::checked_compare_base  
< Compare, is_class >`
