absl::container_internal
::raw_hash_set::rehash

absl::container_internal
::raw_hash_set::reserve

absl::container_internal
::NormalizeCapacity

```
graph LR; A[absl::container_internal::raw_hash_set::raw_hash_set] --> D[absl::container_internal::NormalizeCapacity]; B[absl::container_internal::raw_hash_set::rehash] --> D; C[absl::container_internal::raw_hash_set::reserve] --> D;
```

The diagram illustrates a dependency or call relationship. Three source functions on the left are connected by blue arrows to a single target function on the right. The target function, 'absl::container_internal::NormalizeCapacity', is highlighted with a gray background, while the source functions have white backgrounds with black borders. The arrows originate from the right side of each source box and point towards the left side of the target box.
